

DOVE.
A N
Almanack for
the yeare of our
LORD GOD
1639.

Being the third after bissextile, or leap yeare,
and from the worlds creation (according
to Scaliger, Catopins, Helvicus and such
others) 3588.

Calculated properly for the famous Univer-
sitie and Town of Cambridge, where the
pole is elevated above the horizon 52 degrees
and 17 minutes.

Sapiens dominabitur astris.

Printed by the Printers to the
Universitie of Cambridge.

Shillings.			
In every peice of	33	the reme- die must not ex- ceed	4 grains and an half
	30		4 grains and an half
	22		3 grains.
	20		3 grains.
	16 & 6 pence		2 grains and an half
	11		2 grains.
	10		2 grains.
	5 & 6 pence		1 grain.
	5		1 grain.
	4 4 3 q.		1 grain.
	2 & 9 pence		half a grain,
	2 & 6 pence		half a grain,
Of the currancie of gold.			

And note, that any piece of odde and old gold, (as a 22 or 11 shilling piece) is payable for two pence a grain, when it exceeds the remedie, if it want not above the double remedie. But for new and even gold, (as 20, and 10) they must never exceed their remedie, for if they do, they are not to be offered in payment. Neither are the 22, 11, and such like, to be taken, if they exceed the double of their remedie.

And by observing this difference, the former table will be well understood.

A note of the times forbidding marriage.

When Advent-sunday cometh, marriage is forbidden untill Hilarie, or the 13 of *Januaris*. Then at Septuagesima it goeth out again untill Love-sunday. Afterwards, at Rogation it is also forbidden: but at Trinity-sunday it cometh in again, and so continueth untill Advent.

Note likewise that the Golden number this yeare is
The Cycle of the sunne
The Epact

Observations for husbandmen.

In January take off superfluous branches from fruit-trees, and prepare your ground for gardens, uncover tree roots, cut your vines in some of the twelve dayes.

Set quick-sets, roses, and sallets in the moneth of February. And now cover up the roots of your trees with good earth, which you opened before in the beginning of January.

In March you may graft; but in planting and grafting choose a warm time: wherefore let not the winde be in the East or North, because such windes are commonly nipping, especially being helped by any aspect of the moon, with Saturn or Venus, in cold signes, as Virgo, Capricorn, Taurus, Scorpio, Pisces, or Cancer.

In the end of April, or beginning of May, set and sow tender herbs and seeds in your gardens, in a good temperature of aire.

If you mean to preserve flowers or seeds, gather them in a full moon; let the sun shine first upon them, and they will keep the better: But let them not be dried in the sun, lest the sunne draw away part of their vertue.

Remove young trees either in the end of October, in November or February, the moon increasing: and be sure to set that side south which was south before, because it cannot endure the cold north.

Sheare sheep the moon increasing, and their fleeces will grow the better again. The like observe for cutting of hair, (In \varnothing , \cap , or \cup).

Feed cattell the moon in Aries, Sagittarius, or in Capricorn, being in her last quarter.

Gather all fruits that you mean to keepe, in a drye time, when the moon is at the full.

Sow all such seeds as have round roots (as onions, leeks, turneps, &c.) either three or foure dayes before the full, or three or foure dayes after the full.

January hath xxxi dayes.

- First quarter the 2 day, 36 minutes past 9 morning.
- Full moon the 9 day, 27 min. past 2 afternoon.
- Last quarter the 16 day, 36. min. past 5 morning.
- New moon the 23 day, 47 min. past 10 at night.

h. Saturn is direct untill the nineteenth day of May, from whence he is retrograde untill the 6 of October : after that direct beyond the yeares end.

u. Jupiter begins to be retrograde on the 14 of March, and so continueth unto the 13 of July. But at other times he followeth the succession of the signes.

♂. Mars is direct all this year; and on the 30 day of this moneth he is with the Pleiades, or seven starres. On the 12 of May he and Venus are got together, and are in conjunction in the house of Mercurie; at which time Mercurie is not further then one degree from them: Whereupon it comes to passe, that he and ♄ are in conjunction also on the 21 day of the said moneth, at 7 at night.

Mercurie is retrograde from the 18 of January to the 19 of February; and from the 24 of May to the 16 of June; and from the 17 of September to the 9 of October: but at all other times of the year his motion is direct; that is, according to the succession of the signes.

Four dayes after ♄ enters into ♋ he becomes retrograde, & pas-
 seth backward into ♋ on the last of Jan. continuing in that
 signe till the 7 of March, at which time he comes into ♋ againe
 thence to ♋, by the 16 of the same: after that into ♋ April 11
 thence to ♋ the 27: thence to ♋ May 23; where (after 3 dayes)
 he begins againe to be retrograde, and so goes back to ♋
 from whence, on the 3 of July, he passeth into ♋.

¶ On the 21 of July Mercury leaves cancer and enters into Leo, departing thence into Virgo on the 6 of August: from whence he goes to Libra on the 23 of the same, and passeth not from thence (by reason of another of his retrogradations) untill the 30 of October, at which time he enters into Scorpio.

The dayes increafe

A

¶ A table shewing how long the day is dawning before
sunnes rising, or continuance of twilight after sunne-setting
calculated for the sunnes distance of 15 degrees under
horizon.

Degrees	Capric.	Aquar.	Pisces	Aries	Taurus	Geniu	
	hou. mi.	hou. mi.	hou. mi.	hou. mi.	hou. mi.	hou. mi.	
0	1 53	1 47	1 39	1 40	1 54	2 36	
3	1 53	1 45	1 39	1 40	1 57	2 43	
6	1 53	1 44	1 39	1 43	2 02	2 50	
9	1 52	1 43	1 38	1 43	2 32	2 57

30	1 47	1 39	1 40	1 54	2 36	2 59	
	Sagittar.	Scorpio	Libra	Virgo	Leo	Cancer	

¶ The use of this table followeth in
this example.

The fourth of January the sunne is in the 24 degree of
Capricorn: now coming to this table I finde Capri-
corn on the head of the table, from whence I proceed
downwards until I come against the 24 degree on the
left hand of the table, and there I finde one houre 49. m.
and that is the time that the day is dawning before the
sunnes rising, or the continuance of twilight after sun-
setting that 4 of January: but if the sunnes place be found
at the bottome of the table, then the degrees must be
found on the right hand of the table: and in this manner
may ye finde the distance any other day, which distance
may be called either the dawning or the twilight.

A table

The

The time when these 21 starres following
shall come to the South, either before, or
after the Pleiades or 7 Starres.

- 1 **A** Polla's first head comes to the South after the 7 starres
3 houres, 45 minutes.
- 2 Arcturus after the 7 starres 10 ho. 33 minutes.
- 3 Bulls eye after 7 starres 49 minutes.
- 4 Corona. Lucida Coron. after 7 starres 11 ho. 53 min.
- 5 Dog. The great Dog after 7 starres 3 ho. and 3 min.
- 6 Dog. The lesser Dog after 7 starres 3 ho. 54 min.
- 7 Eagle. The flying Eagle before 7 starres 7 ho. 52 min.
- 8 Fomahant before the 7 starres 4 ho. 49 min.
- 9 Goat. The Goat after the 7 starres 1 ho. 24 min.
- 10 Harp. The Harp before 7 starres 9 ho. 1 min.
- 11 Hydra's bright starre after the 7 starres 5 ho. 44 min.
- 12 Lions heart after 7 starres 6 ho. 23 min.
- 13 Lions tail after 7 starres 8 ho. 5 min.
- 14 Orions right shoulder after 7 starres 2 ho. 9 min.
- 15 Pegasus shoulder before 7 starres 4 ho. 31 min.
- 16 Pegasus leg before the 7 starres 4 ho. 40 min.
- 17 Pole starre before the 7 starres 2 ho. 57 min.
- 18 Scorpions heart before 7 starres 11 ho. 18 min.
- 19 Swannes tail before the 7 starres 6 ho. 57 min.
- 20 Spica virginis after the 7 starres 9 ho. 4 min.
- 21 Whales south tail before 7 starres 3 ho. 1 min.

This table needeth little explaining: onely let me say that
it is of use to know these forenamed starres, and by the
starres, the houre of the night.

A figure of the Sphaera according to Tycho.

The compasse of the earth is said to be one and twenty thousand and six hundred miles. And yet

- 1 Saturn is said to be greater then the earth 22 times.
- 2 Jupiter greater then the earth 14 times.
- 3 The Sun also greater then the earth 140 times.

4 Mars
5 Venus
6 Mercury
7 The moon
But } lesse then the earth } times *

And knowe that it is obserued, that there are 6 severall magnitudes or different bignesses of the fixt starres one bigger then another, and that those of the least stature are almost as great as the earth; those of the biggest being 68 times greater then it: amongst which that which is called the great Dog-starre is chief.

Oh.

Observations concerning the change of weather.

Signes of fair weather.

The sun rising and setting clear; The moon clear
three dayes after the change, or three dayes before
the Full; Spots appearing in a full moon, tofore
sun-setting; Clouds with golden edges; A cloudy sky
clearing against the soone; The Rain-bow appearing
onely meanly red and yellowish; A red evening with
a gray morning; The Crow crying betimes in the morn-
ing; all these are usual signes of fair weather.

Signes of Rain.

When the sun in his rising is hid in black clouds
when the moon within 3 or 4 dayes after the
Change is blotted on both horns; A Rain-bow appearing
in a fair day, the greener the more rain; The extraordi-
nary chattering of the Pie; The often twitting of the
oswl; The roaring of the Peacocks; Cattel licking their
hoofs behinde; When but the biggest stars onely appear
and that will fly; Late or Viol strings cracking when
they are not touched; All these are usual signes of rain.

Signes of winde.

Red clouds in a morning; Often shooting of starrs
Clouds flying swift in a cleare aire; The Rain-bow
red; Black circles with red strakes about the sunne
moon; stars dimbe and fiery. But it is a signe of winde
and showers, when the sun-beams appeare before the
sunne riseth; or if the sunne see pale, or be hid under
a black circle when he is neare the time of his setting.

Signe

Signes of hot weather.

Many Birds flying abroad sooner then ordinary, & white mist arising out of Woods, or Waters, either before sunne rise, or after sunne setting; Birds flying high in the aire, Crows or Ravens gazing against the sunne; Swarms of flies playing in the sunne shining towards night.

Signes of Cold Weather, of Frost, of Snow, and of Hail.

Clouds flying low, seeming to touch the tops of hills, are signes of cold weather; Great flocks of small birds gathered together in the beginning of winter do foretell either cold storms, or frosty weather; If in the winter the sunne shine cleare towards night, and redder then before, any cold winde blowing, expect a frost; The extraordinary twinkling of Starres foretelleth a hard frost; Clouds upon heags like rocks, in summer hail, but in winter snow; An obscure starle about the sunne or moon in the winter, or a sudden overcasting of the aere is a very likely token of snow.

Signes of Drought.

Starres seeming dimme, and very red, do signifie either drought, or wind, or both.

Signes of the continuance of a Frost, and of Thawing.

Snow falling in the beginning of a frost if it fall very small, then is the weather colder and the frost like to hold; but if the snow fall big, and in great flakes, then is it like to thaw very suddenly; other signes of a thaw may be the sudden turning of the winde, especially into the South &c

Kings of ENGLAND.

Note that every king since the Conquest, where this table takes his originall, begins his reigne immediately upon the end of the foregoing kings reigne, without any intermission.

Of the eclipses this yeare.

There will be this yeare foure eclipses, two of the sun, and two of the moon: of which there will be but one visible in our horizon; and that of the sunne.

This eclipse will happen on Wednesday, the 22 day of May, about 4 of the clock in the afternoon, at which time the sunne beginneth to loose part of his light: the middle will be at 5: and the end a little before 6: so that the whole time from the beginning to the end, wanteth but 6 or 7 min. of two houres; and the digits, or parts eclipsed are 10, and neare 40 minutes: that is to say, 10 digits, 29 minutes, and 52 seconds.

The two luminaries at the time of this eclipse, are in the tenth degree of Gemini, which is the day-house of Mercurie, the tern and face of Jupiter, the exaltation of the dragons head; and the trinitie of Saturn, Mercurie, and Jupiter: where also the dragons taile and Jupiter have their fall. It is a signe aerall, hot and moist, masculine, of the day, common, &c. ruling the wonders, arms, and shoulderbone, as also the hands, and sicknesses of those members proceeding of blood.

I ad note, that Mercurie is then in the same signe with the sunne & moon, being his own proper house, and distant from them about 20 degrees: Saturn is in the 19 degree of Aquarius, Jupiter in the 29 of Scorpio, Mars entering into Cancer, and Venus but five degrees before him, viz. in Cancer 5. 20. or thereabouts: at which time the dragons head is in the 18 degree, and 41 minuts of Sagittarius.

But of the other eclipses, because they be not visible in our horizon, I have nothing to say.

The regiment of the twelve signes over the
bodie of man.

Bold *Aries* both Head and Face commands;
In Neck and Throat fierce *Taurus* glory stands.
The Arms and Shoulders *Gemini* do sway;
Breast, Promack, Ribs, the *Greafish* do obey.
Leo the Heart, the Bellie, & *Virgo* s. Thanes
Libra of Reins and Loynes doth take the care
Within the Secrets *Scorpio* doth reigne;
But to the Shooter both the Thighs remain;
Aquarius hath Legs to govern still;
And *Capricorn* the Knees rules at his will
And *Mik*, the Feet by *Pisces* are controll'd;
For to fare forth the Fulber dare be bold.

The characters of the twelve signes, with
the seven planets, &c.

The Northern signes.

Aries, *Taurus*, *Gemini*, *Cancer*, *Leo*, *Virgo*.

The Southern signes.

Libra, *Scorpio*, *Sagittarius*, *Capricornus*, *Aquarius*, *Pisces*.

Saturn, *Jupiter*, *Mars*, *Venus*, *Mercurie*, *Luna*.

Conjunction. Opposition. Trine. Quartile. Sextile.

The dragons head. The dragons tail.

The dragons head. The dragons tail.

The dragons head. The dragons tail.

Years before the first year of
Christ in the world account.

A brief Chronological description
of many things worthy of me-
mory, both before and since
the birth of our Saviour, in
which you may see how long
they happened before this year
of our Lord 1639.

The numbers being all truly corrected and

amended by the Author.

1764

Ogyges found in Attica.

1458

Deucalions flood in Thessaly.

1329

Janus began his reign in Italy.

1113

Amphion the rare Harper about this time.

1178

The birth of Proserpina about this time.

1170

Sphinx and Oedipus.

1145

The warre of the Carians with the Athenians.

1103

Wherein the Athenians being overcome, were

compelled to give their sonnes to the Mi-
noraur.

1148

Hercules kills the giant Cadus.

1126

The voyage into Colchos for the golden fleece.

1120

The Labyrinth in Crete built by Dedalus.

1118

The destruction of Troy.

1189

Aeneas comes into Italy, and is entertained

there by Lavinia, and married to Lavinia.

1100

Brute arrives in this Island, and soon after

buildeth London.

989

Ebrahe began to reigne, in whose time

was built.

Lycurgus

For the
year of
Christ.

Memorable accidents.

Tragedies
expired.

126	Lycurgus makes laws at Sparta.	2561
17	Carthage built about this time.	2558
11	Homer (according to Solinus) lived till 27 years after the destruction of Troy.	2550
95	Carthage first built in hundred and nineteen years before the Olympiads.	2534
92	Lud Hurdibras began his reign; in whose time Canterburie, Winchester, and Shafesburie were built.	2531
56	Aladrius, a wicked king of the Latines, striving to imitate the Thunder, was with his whole palace swallowed into the earth.	2491
44	King Leier began his reign; in whose time Leicester was built.	2483
14	Carthage was secondarily built some 38 years before the Olympiads began.	2453
76	The first year of the Olympick Kalender.	2441
70	The birth of Romulus and Remus.	2409
72	The building of Rome.	2391
64	Aion the Phoenician flourished.	2303
72	Phalaris the cruel tyrant of Sicily, with his brazen bull.	2211
55	Alophont about this time.	2194
10	Lacretia, being ravished by Tarquinus, kills her self.	2149
31	Darius is vanquished by Alexander, and the Persian Monarchy endeth.	1977
24	Alexander the Great died in this year, being the 33 years of his age.	1963
300	Cambridge built about this time. Christ. Three years before which, Grantham began to be built.	1939

Years of
the ship.

year
cap-
red.

land, and Jerusalem, which ever Auro hath
remained under his Dominion, thither go
many on pilgrimage: whereupon the Turk
callety himself the keeper of the Christians
God.

1544	King Henry 8 conquereth Bullein.	112
1555	Coaches first used in England.	95
1569	The Earls rebellion in the North.	84
1572	The Massacre of Protestants at a marriage in France, where there was not so much wine drunk, as blood shed. And in the same yeare soon after the said Massacre, that strange starre in the constellation of Cassi- opea, began to appeare.	70
1574	The whole Heavens seemed to burn.	67
1577	A great blazing starre in this yeare.	65
1580	A generall Earth-quake in England on April the 6, and on the eighth of October follow- ing, was another blazing starre for the space of 3 moneths.	62
1582	Another blazing starre, May the 15.	59
1585	The first yeare that Tobacco was used in England, brought hither by the mariners of Sir Francis Drake.	57
1588	Tilbury camp, on S. James his Day.	54
1596	The voyage to Cadix.	51
1605	The Powder treason discovered, November 5.	48
1607	The last great frost.	34
1618	The last blazing starre.	32
1623	Our noble King Charles (then Prince) be- ing been in Spain, arrived safely in En- gland on the 5 of October.	28

Mary

Dece 1639.

Memorable accidents.

The year
expired.

1619 Mary our Queen arrived at Dover on the
12 of June.

1630 On the 19 of May our young Prince Charles
was born.

In the same yeare the plague was at Cam-
bridge: but note that it began on the 28 day
of February 1629, and ended not untill the
5 of January next after.

1631 The Lord Castlehaven arraigned.

1632 The Lady Mary born, Novem. 4.

1633 The progresse into Scotland by our gracious
King: In which yeare the Duke of York
was also born.

1634 The Lady Elisabeth born, Decemb. 28.

1636 The Achmet at London, and in some other
parts of this kingdom.

1637 A

On the 27 of March begins the
15 yeare of our KING.

VIVAT REX

AMEN

DICAT GREX

and situated about
1/2 mile from the
mouth of the river.
